Altamonte Springs, FL 32714

Overview

A global resource for clinical coding companies to create accounts and other companies that need to find coding contractors for hire. Solves a problem where companies that offer this service are very hard to find and sometimes are not sure where to promote. Allows other companies to easily share and communicate with the contractors and find them all in one database

Goals

1. Create a bridge between people in need of coders and companies offering the service
2. Profiles for both employer and contractors
3. Subscription based accounts for monetization
